

Venlafaxine Hydrochloride Extended-Release Capsules

Type of Posting	Revision Bulletin
Posting Date	26-Feb-2021
Official Date	1-Mar-2021
Expert Committee	Small Molecules 4

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 4 Expert Committee has revised the Venlafaxine Hydrochloride Extended-Release Capsules monograph. The purpose for the revision is to add *Dissolution Tests 10* and *11* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution tests.

- *Dissolution Test 10* was validated using the Zorbax SB-C18 brand of column with L1 packing. The typical retention time for venlafaxine is about 5 min.
- *Dissolution Test 11* was validated using the Zorbax SB-C18 brand of column with L1 packing. The typical retention time for venlafaxine is about 3 min.

The Venlafaxine Hydrochloride Extended-Release Capsules Revision Bulletin supersedes the currently official monograph.

Should you have any questions, please contact Nicholas Garito Jr., Sr. Scientific Liaison (301-816-8321 or njg@usp.org).
